

The CEA-CNET Consumer Sentiment Indexes

The CEA-CNET Consumer Sentiment Indexes represent more than three years of research into cutting-edge methods for measuring consumer expectations about the future. The indexes measure how consumers perceive the overall health of the economy and the outlook for technology spending. Both indexes focus on consumer perceptions of the future. These forward looking expectations provide market observers valuable information into how consumers will likely behave over the pursuing months.

Consumer Sentiment moved up again in May as measured by the CEA-CNET Consumer Confidence Index. The stock market has increased significantly since bottoming in early March and consumers are consequently feeling more optimistic about their future financial wellbeing. Consistent with this, the outlook for consumer electronics sales increased in May.

- In May, the CEA-CNET Index of Consumer Expectations increased significantly – hitting its highest level since February 2008.
- Consumers are more optimistic about the future outlook for the economy, and believe they will be financially better off in the year to come, but expectations for employment remain muted

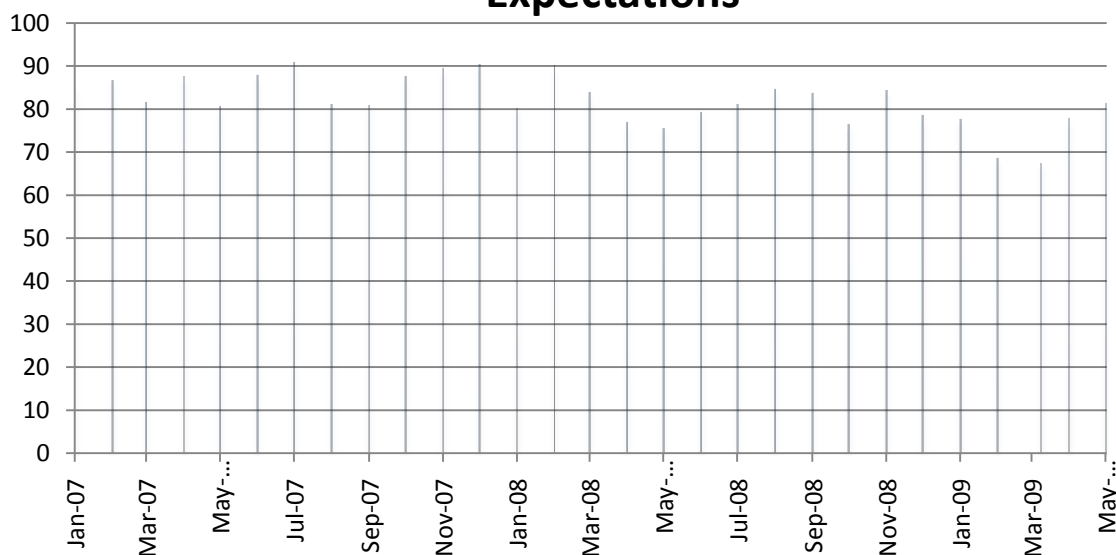

The CEA-CNET Index of Consumer Technology Expectations

The CEA-CNET Index of Consumer Technology Expectations (ICE) measures consumer expectations about technology spending. The index carries a maximum value of 200 and a minimum value of zero.

CEA-CNET Index of Consumer Technology Expectations

- In May, the CEA-CNET Index of Consumer Technology Expectations (ICTE) increased, and is roughly eight percent higher than the same time period a year ago.
- Consumer spending has likely bottomed, which is consistent with May’s results as well as with the timing associated with past recessions.

About the CEA-CNET Consumer Sentiment Indexes

The CEA-CNET Consumer Sentiment Indexes are a joint effort of CEA and CNET. The Indexes are published monthly on the fourth Tuesday of each month. The survey data are collected each month by random-digit-dial for 1,000 respondents and weighted to be representative of the U.S. population.

For an in-depth analysis of the methodology used in the CEA-CNET Consumer Sentiment Index see the whitepaper “The CEA-CNET Consumer Sentiment Indexes.”
